

Report Parameters

Next, establish report parameters by completing the Report Parameters tab shown below:

Select the Report View and Report Type to populate this screen. **You may only select report views that you have processed.** The report options are described below:

- Detail – This will create a workbook with Area Summary, Uncapped Analysis, Capped Analysis, Uncapped Density Summary, Capped Density Summary, Uncapped ARMIS Format, Capped ARMIS Format, Household Summary, Inventory and Variables tabs.
- Summary – This will create a summary workbook based on the inputs on the Report Options tab of the reporting module. The report options are group and report breakout settings in Loop Statistic, Investment Statistic, Residence Aggregate Support, Business Aggregate Support, and Total Aggregate Support.
- WC Summary – This will create a wire center summary report with the same parameters as the summary setting.

After you select the report view and type, set the report parameters by specifying the state, company, holding company, or the wire center you want results for by highlighting your choice and clicking **SELECT** or by clicking twice on the name of the company, state, etc.

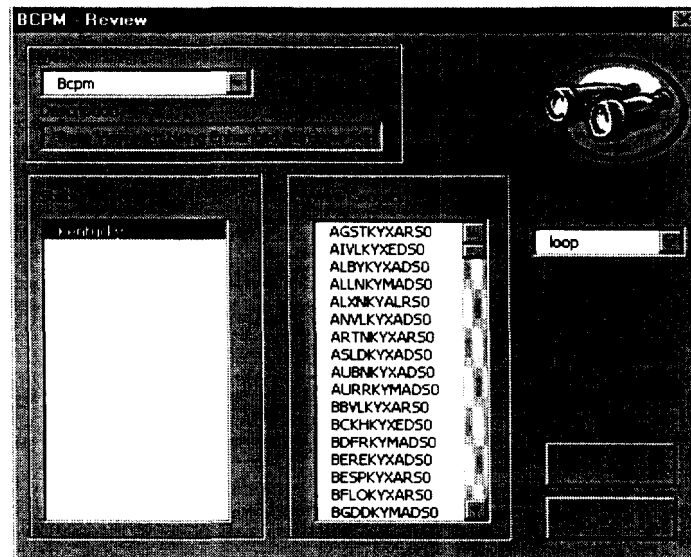

Click Preview to view the model results in a worksheet format. A worksheet will appear and a BCPM toolbar which will enable you to Print, Save As and Close. You can use the drop down menu to select the report you wish to view, print or save.

Review

The review portion of the system is for auditing the module calculations in BCPM. Access this subsystem by click on the **REVIEW** button.

When you click on the **REVIEW** button you will see the Review dialog window.

When you see this screen you must select a View. Then you can select the module you would like to review. The system will work for several seconds while it pulls module data. You can then select the state and the wire center for review. Click on the OK button and the system will present you with the workbook that contains the calculations for your selection. You can then evaluate the calculations used for your View.
